March 2010

RE: APRIL 1, 2010 PRICE INCREASE

To Our Valued Customers:

Most of us have been around this industry for a number of years, and recall what the domestic steel mills did regarding pricing and lead times in 2004 and 2008. This seems to be the direction they are heading in 2010. We have received monthly increases since January and all indications are that this trend will continue in the coming months.

The main reasons for these monthly increases are the extremely high costs of raw materials needed to produce steel. The projection for these materials such as iron ore and scrap are prices will continue to escalate throughout 2010.

**Therefore Super Stud Building Products will increase pricing on all metal framing products and accessories effective April 1, 2010.**

Please contact your sales representative to review all outstanding quotations that have expired or will soon expire in accordance with our job quotation policy.

If you have any questions, please contact your Super Stud Building Products Sales Representative.

Thank you for your business and continued support.

To: Our Valued Customers

Subject: PRICE INCREASE ANNOUNCEMENT EFFECTIVE MARCH 1,2010

The domestic steel mills continue to raise prices every 30 days. These increases are due to the rising costs of raw materials.

The reality we are faced with is it costs more to produce Steel and regardless of the economy the mills are not going to absorb any of the increase costs they are experiencing.

Therefore Super Stud Building Products is announcing a 10% to 15% increase on all metal framing products effective with shipments on or after March 1, 2010.

Please contact your sales representative to review all outstanding quotations that have expired or will soon expire in accordance with our job quotation policy.

If you have any questions, please contact your Super Stud Building Products Sales Representative.

Thank you for your business and continued support.

Sincerely,

Chris Chimera
